Department Fleet and port operations			
<p>Learning outcomes:</p> <p>1. The students WILL BE FAMILIAR WITH:</p> <ul style="list-style-type: none"> - The distribution of duties and responsibilities between the parties to the transport provisions in sale/purchase contracts according to the international rules, Incoterms 2010; - The causes of the fluctuations in the freight markets, the effect of the forces of supply and demand with free and monopolised competition, the influence of price elasticity; - The organisation of freightage in tramp shipping and in line shipping; - The structure of the expenditure on the voyage. - The structure and the contents of contracts for the carriage of goods by sea and the practice of using shorthand terms and phrases. - The methods and documents to estimate laytime in a voyage charter. - The structure and the contents of timecharters. - The procedures for obtaining <i>free pratique</i> and for serving a notice of readiness. - The requirements for quality performance of shipping and charter contracts - complaints, claims, protests. - The purpose and contents of the shipping documents. - The organisation of shipping agency at ports. <p>2. The students WILL BE ABLE TO:</p> <ul style="list-style-type: none"> - Identify the buyer and seller of the goods and their relation to the consignor, the forwarder and the consignee of the cargo. - Evaluate the causes for the state of the freight market and their impact on the terms and conditions of shipping contracts and timecharters. - Calculate the costs for a voyage. - Work with charters and shipping documents. - Understand the contents of telex messages and shorthand phrases when performing voyages and timecharters. - Properly fill in the navigation log in port and draw up the documents to calculate laytime. - Work with documents for filing complaints and compensation claims. - Draw up notices of readiness and letters of protest. - Work with the shopping agent to implement the commercial decisions by the company executive management. 			
<p>Grading system: The course in the discipline ends with examination.</p> <p>To obtain their final grade, the students are given a number of assignments, and their respective grade can be multiplied by a weighting coefficient, or the separate grading assignments (targets) can bring score points. The sum total is 100 points. The continuous assessment grade is determined by a formula containing the respective grades from the different assignments according to the number and type of testing.</p> <p>The assessment criteria are the extent to which the student has acquired and can demonstrate his/her knowledge of the subject of the discipline and the student's familiarity of the literature on that subject.</p>
